Econometric tools for performance and risk analysis. Description. PerformanceAnalytics provides an R library of econometric functions for performance and risk analysis of financial instruments or portfolios.

R: Econometric tools for performance and risk analysis.

Where $GCFit$ is the gross fixed capital formation as a percent of real GDP used as a proxy for investment in physical capital; $ENRit$ is log of secondary school enrollment used as measure of investment in human capital which has a positive effect on the economic growth of developing countries (Stark and Lucas, 1988).

The impact of remittances on economic growth: An econometric model

The Heckman correction (the two-stage method, Heckman's lambda or the Heckit method) is any of a number of related statistical methods developed by James Heckman at the University of Chicago from 1976 to 1979 which allow the researcher to correct for selection bias. Selection bias problems are endemic to applied econometric problems, which make Heckman's original technique, and subsequent refinements

by both himself and others, indispensable to applied econometricians.

Deltix provides software and services to buy-side and sell-side firms for quantitative research and algorithmic trading. We cover data collection and aggregation, advanced analytics, model development, back-testing, simulation and live trading.

QuantOffice - Deltix | Advanced Quantitative Strategies

In general, bootstrapping usually refers to a self-starting process that is supposed to proceed without external input. In computer technology the term (usually shortened to booting) usually refers to the process of loading the basic software into the memory of a computer after power-on or general reset, especially the operating system which will then take care of loading other software as needed.
