Introduction â€œ In this lecture, we will give you a brief introduction to the subject of graphical user interface (GUI) programming. â€œ We cannot show you everything about GUI application

GUI Programming using Tkinter2

This is Windows API tutorial for the C programming language. It is pure Windows API tutorial. It does not cover MFC. After reading this tutorial, you will be able to program non trivial Windows applications. Even if you program in a higher level programming language, this tutorial will give you

Windows API tutorial - C GUI programming in Windows API

C# (pronounced C sharp) is a general-purpose, multi-paradigm programming language encompassing strong typing, imperative, declarative, functional, generic, object-oriented (class-based), and component-oriented programming disciplines. It was developed around 2000 by Microsoft within its .NET initiative and later approved as a standard by Ecma (ECMA-334) and ISO (ISO/IEC 23270:2006).

C++, an extension of well known C language, is an excellent, powerful and general purpose programming language that offers modern and generic programming features for developing large-scale applications ranging from video games, search engines, other computer software to operating systems.

18 Best IDEs for C/C++ Programming or Source Code Editors on - Tecmint

How do you pronounce "Bjarne Stroustrup?" It can be difficult for non-Scandinavians. The best suggestion I have heard yet was "start by saying it a few times in Norwegian, then stuff a potato down your throat and do it again :-)" Here is a wav file.

FAQ - Bjarne Stroustrup

This document is a quick introduction to the C programming language. It is written by a novice, and is intended for use by a novice. However, it does assume familiarity with a programming language. The C programming language is a "middle-level" language. It provides low-level programming capability

A Little C Primer - Wikibooks, open books for an open world

Binary Numbers in C. When you write `a=110`; in C it means you are setting the value of variable "a" to "one hundred and ten" (in decimal). Many time in embedded programming we are not interested in the value of a variable but the state of each bits in the variable.
