Arno Meysman is one of the founders and managing partners of Optimately where he focuses on leading and developing data science projects and solutions in various sectors and closely follows new developments in data science.

Introducing Data Science: Big Data, Machine Learning, and more, using

A weekly roundup of information on newly offered instrumentation, apparatus, and laboratory materials of potential interest to researchers.

Science

Big data refers to data sets that are too large or complex for traditional data-processing application software to adequately deal with. Data with many cases (rows) offer greater statistical power, while data with higher complexity (more attributes or columns) may lead to a higher false discovery rate. Big data challenges include capturing data, data storage, data analysis, search, sharing, transfer, visualization, querying, updating, information privacy and data source.

Big data - Wikipedia

Big data will become a key basis of competition, underpinning new waves of productivity growth, innovation, and consumer surplus--as long as the right policies and enablers are in place.

Big data: The next frontier for innovation, competition, and

The Data Science Salon is a destination conference which brings together specialists face-to-face to educate each other, illuminate best practices, and innovate new solutions in a casual atmosphere with food, drinks, and entertainment.
