Clinical Trials, Second Edition, offers those engaged in clinical trial design a valuable and practical guide. This book takes an integrated approach to incorporate biomedical science, laboratory data of human study, endpoint specification, legal and regulatory aspects and much more with the fundamentals of clinical trial design.

Introduction. Stratified randomization is a two-stage procedure in which patients who enter a clinical trial are first grouped into strata according to clinical features that may influence outcome risk.

Stratified Randomization for Clinical Trials - ScienceDirect

Clinical trials are usually conducted in phases that build on one another. Each phase is designed to answer certain questions. Knowing the phase of the clinical trial is important because it can give you some idea about how much is known about the treatment being studied.

What Are the Phases of Clinical Trials? - American Cancer Society

The phases of clinical research are the steps in which scientists do experiments with a health intervention in an attempt to find enough evidence for a process which would be useful as a medical treatment.

Phases of clinical research - Wikipedia

Many of us speak about the importance of clinical trial data quality and integrity, yet the lack of data quality standards and definitions introduces subjectivity risk in clinical trials.

Define Clinical Trial Data Quality - Applied Clinical Trials Home

The law requires coverage for phase I, II, III, or IV clinical trials related to prevention, detection, or treatment of cancer or other life-threatening disease if the study meets one of these requirements:

How Do I Find a Clinical Trial That's Right for Me?

The randomized controlled trial is one of the simplest but most powerful tools of research. In essence, the randomized controlled trial is a study in which people are allocated at random to receive one of several clinical interventions. On most occasions, the term "intervention" refers to treatment, but it should be used in a much wider sense to include any clinical maneuver offered to study participants that may have an effect on their health status.
