Open Access Publications. These are publications made freely available by either the author, a funding organization, or MSA. MSA will host additional open access publications about mineralogy, crystallography, petrology, and geochemistry that it believes to be of interest to its membership.

### **Mineralogical Society of America - Open Access Publications**

Most concrete produced today includes either chemical additions to the cement, chemical admixtures in the concrete, or both. These chemicals alter a number of properties of cementitious systems, including hydration behavior, and it has been long understood by practitioners that these systems can differ widely in response to such chemicals.

### **Impact of admixtures on the hydration kinetics of Portland cement**

Acknowledgments The U.S. Department of Energy for funding through the Remediation and Closure Science and Science Focus Area Projects. Kathryn Draper, formerly of the Pacific Northwest
