Predictive modelling uses statistics to predict outcomes. Most often the event one wants to predict is in the future, but predictive modelling can be applied to any type of unknown event, regardless of when it occurred.

Predictive modelling - Wikipedia

OPP uses aquatic models to estimate pesticide concentrations in food, water, non-target organisms, residential and occupational environments. These estimated concentrations are used to assess exposure to aquatic organisms, humans, and the environment.

Models for Pesticide Risk Assessment | US EPA

To make hotel accommodations, go to NPIC&HMIT housing link: Renaissance Orlando At SeaWorld no later than January 18, 2019. In order to receive the special group discounted rate of \$219, mention that you are attending the 2019 NPIC&HMIT Conference.

Read the risk assessment overview to find out if you need to carry out a groundwater risk assessment as part

of your permit application.

Groundwater risk assessment for your environmental permit - GOV.UK

The Rasch model, named after Georg Rasch, is a family of psychometric models for creating measurements from categorical data, such as answers to questions on a reading assessment or questionnaire responses, as a function of the trade-off between (a) the respondent's abilities, attitudes, or personality traits and (b) the item difficulty. For example, they may be used to estimate a student's reading ability or the extremity of a person's attitude to capital punishment from responses on a ...
